Appendix 5: Bittoun Combination Nicotine Replacement Therapy Algorithm for Adolescents who Vape

*TTFV – Time To First Vape

** Consider adding 14 to 21mg patch depending on child's weight

† Either 4 mg nicotine gum or lozenge depending on patient choice. An inhaler or sublingual tablet is recommended as best choice if patient needs faster reinforcement.

(Based on: "A Combination Nicotine Replacement Therapy (NRT) Algorithm for Hard-to-Treat Smokers", Bittoun, 2006)
